(54) Title: PRINTING FLUID FOR FLUID-JET PRINTING

(57) Abstract: The invention relates to a printing fluid suited for fluid-jet printing. The printing fluid comprises first particles having a first size (s_1) that falls within a first size distribution (I), and second particles having a second size (s_2) that falls within a second size distribution (II) different from said first size distribution, said first and second particles being of substantially a same material. It has been demonstrated that by using such a printing fluid a layer can be printed with an improved uniform layer thickness.
